

India's Trusted

Manufacturer & Exporter of LLDPE Roto Moulding Powder

Quality through
Compounding & Pulverizing

About The Company

Pacific Polycompounds LLP is an established manufacturer and exporter of high-quality LLDPE Roto Moulding Powders

Providing innovative polymeric solutions to the national and foreign markets. With our advanced in-house processing unit situated in the hub city of Ankleshwar, Gujarat, we are situated in the middle of one of the most advanced industrial hubs on the continent of Asia.

We have always leveraged the latest compounding and pulverizing technology, in conjunction with an advanced R&D laboratory. What we manufacture is used by varied industries who are into manufacturing water storage tanks, road barriers, furniture, containers, and other items. Everything we do here is done by keeping in mind the latest technological advancements. We guarantee our products to offer excellent resistance and a long service life.

At Pacific Polycompounds LLP, we don't just manufacture compounds – we engineer materials that turn ideas into durable, high-performance products.

Our Mission

Customer Satisfaction and Excellent Service ensuring you that our production will contribute greatly to your business and bring you benefit.

Our Vision

To be our Customers first Choice when selecting a world-class Manufacturers of LLDPE Roto Moulding Powder.

Mindset

Why Choose Us?

- ✓ Weatherproof with UV
- ✓ Durable & Long Lasting Life
- ✓ Save Energy & Fuel Consumption
- ✓ Attractive Exterior Finish
- ✓ Extra Shining

Our Products

LLDPE Powder for Rotomoulding

Pacific Polycompounds LLP manufactures premium LLDPE Roto Moulding Powders engineered for superior flow, uniformity and long-term performance. Designed for both simple and complex roto moulded products, our powders offer excellent mouldability, mechanical strength and high environmental resistance. Whether it is for water tanks, road safety products, furniture or industrial components, our LLDPE grades deliver consistent quality and reliability in every application.

Different Properties for Many Applications

Our LLDPE powders are engineered to perform across varied industrial and commercial needs. Below are the key grade categories:

Standard Grade Powders

Ideal for general-purpose applications with excellent mouldability and balanced mechanical properties.

Key Features:

- ✔ Smooth surface finish
 - ✔ Good mechanical strength
 - ✔ Uniform particle size distribution
 - ✔ Excellent processability
- Suitable for tanks, containers, bins and furniture

UV Stabilised Powders

Designed for long-term outdoor performance with enhanced resistance to sunlight and weathering.

Key Features:

- Added UV stabilisers for extended life ✓
- Prevents colour fading and material degradation ✓
- Suitable for water tanks, agricultural products and road safety equipment ✓
- High environmental stress crack resistance ✓

Foamed Powders

Used for lightweight applications requiring insulation or low-density structures.

Key Features:

- ✓ Reduced density and material usage
- ✓ Excellent thermal insulation
- ✓ Good impact strength
- ✓ Ideal for coolers, floats, insulated containers and speciality products

Custom Formulations

Tailor-made grades developed to suit specific project requirements.

Available Customisations:

- Melt flow rates (MFR) ✓
- Colour matching ✓
- Impact strength variations ✓
- Flexibility/rigidity adjustments ✓
- Additive enhancements (anti-static, flame retardant, etc.) ✓

We work closely with customers to deliver high-performance, application-driven solutions.

Recycled LLDPE Powder

Environmentally responsible solutions designed for cost effective production.

Key Features:

- ✔ Sustainable and eco-friendly
 - ✔ Suitable for non-critical applications
 - ✔ Cost-effective raw material
 - ✔ Available in multiple colours and formulations
- Ideal for dustbins, partitions, planters and various low-load structural components.

Quality Assurance

Quality is inbuilt in each step of our manufacturing process. Pacific Polycompounds LLP has in place a rigorous quality control process designed and supported by the latest technology and technical and laboratory procedures. Raw materials are thoroughly inspected before processing, and quality checks, in terms of melting flow, particle size distribution, and colour, are carried out in the in-process stage. The quality of each production process has also been checked for its mechanical, UV, and environmental resistance and performance.

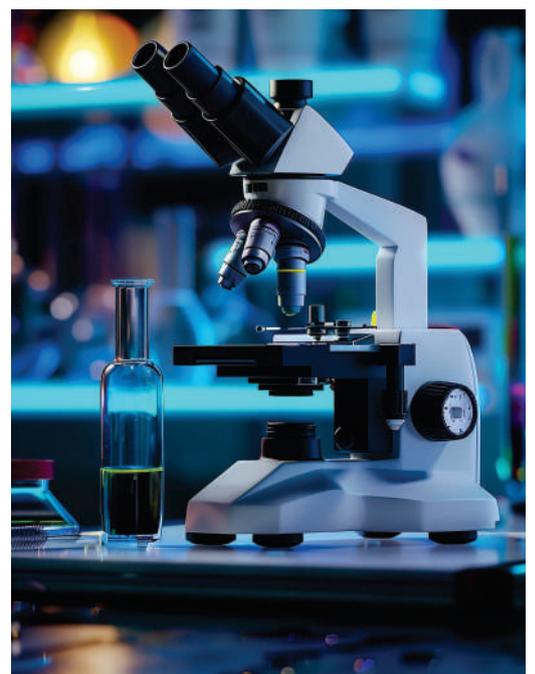

At Pacific Polycompounds LLP we ensure the delivery of powdery materials that are reliable, weatherproof, and easy to manufacture. Pacific emphasises the “Quality Through Compounding and Pulverising” in all their deliveries through an unrelenting principle of attention to detail.

Research & Development

Our R&D division forms the technological backbone of Pacific Polycompounds LLP.

With a multi-stage, professionally run laboratory, our unit provides advanced testing, formulation, and development on a constant basis.

Every consignment undergoes stringent testing in terms of flow, particle size distribution, mechanical strength, and UV stability. Our team of skilled and dedicated experts in the field works round the clock in developing innovative grades, improving the performance variables, and developing customised solutions on the lines of the distinct demands placed by our clients. With our roots in the domain of material science and process development, our R&D works on ensuring that our LLDPE Roto Moulding Powders meet the best worldwide quality.

Application

Our Products LLDPE Roto Moulding Powder are Exclusively Used in Roto Moulding Articles.

**Water
Storage
Tanks**

**Road
Barriers**

Dustbins

**Plastic
Boxes**

**Plastic
Containers**

**Roto
Moulded
Chairs &
Furniture**

Our Expertise

Innovation, consistent quality, and customer satisfaction are the foundation of PACIFIC POLYCOMPOUNDS LLP. We specialize in delivering premium LLDPE Roto Moulding Powders for diverse industrial applications.

In-House Manufacturing Facility

Our state-of-the-art manufacturing plant in Ankleshwar, Gujarat ensures complete control over production, quality, and consistency from start to finish.

Customized Solutions

We develop tailor-made LLDPE formulations and colours to meet specific client requirements, ensuring precision and performance for every application.

Durable & High-Performance Products

Manufactured using premium-grade raw materials, our powders provide exceptional durability, UV stability, and strength in every rotomoulded product.

Unmatched Expertise

Backed by years of experience and technical know-how, our team ensures superior product quality, process innovation, and customer-focused solution

Our Market

Across India, Pacific Polycompounds LLP supplies high-quality LLDPE Roto Moulding Powders to manufacturers in sectors like water storage, waste management, road safety, agriculture and lifestyle products.

Having the benefit of a strategic location and logistics support, we provide perfection when it comes to delivering and performance of our products.

In fact, we also export worldwide! We have carved a niche as a renowned and trusted brand due to factors like durability, colour stability, and the ability to meet global quality standards. We have proper export procedures in place and provide consistent quality, making it possible for us to establish long-lasting relationships and provide the best quality polymers from India.
